The most attractive feature of the show is Japanese cosmetics. COSME TOKYO 2018 gathers a remarkable lineup of Japanese cosmetics. Most Japanese cosmetics to be exhibited at COSME TOKYO 2018 cannot be found at any other exhibitions in the world. Generally, Japanese cosmetics are popular worldwide for high quality, reliability, cost performance, etc. However, there are much more products which are yet to be known outside Japan, especially products made by small-and-medium sized manufacturers. As the number of exhibitors including those companies will increase from the last edition, COSME TOKYO 2018 is the must-visit exhibition for international visitors looking for high quality Japanese cosmetics.

Trend Cosmetics – Men's care, Anti-aging, Organic/Natural etc.

The show gather numerous number of trendy cosmetics. These days, consumers are paying a lot more attention to Men's care and cosmetics which has high functional specification such as anti-aging, organic/natural ingredients, bio science used, and more. COSME TOKYO 2018 is where to compare and source such featured cosmetics. As more and more exhibitors are deciding their exhibiting, the Show Management is getting more excited to reveal those brands' information to provide for visitors.
